### **DETAILED ACTION**

Applicant's amendment and remarks received 29 August 2007 have been fully considered. In view of the arguments presented, Claims 6-8 and 14-29 are allowed.

#### ***Examiner's Statement Of Reasons For Allowance***

The following is an examiner's statement of reasons for allowance:

As stated in a previous Office action, mailed 19 December 2002, paper number 4, the relevant prior art does not teach or reasonably suggest a method (and system for using method) that alters an optical waveguide to achieve a desired signal response using the steps of: inducing an increase in the refractive index of the guide, measuring an optical signal response of the guide, heating a localized region to reduce the increase in the refractive index to match desired signal response, and repeating these steps until the desired signal response is achieved. The prior art teaches the formation of an initial increase in refractive indices of waveguide and the subsequent trimming of the waveguides for characteristic adjustment, but does not teach the measuring and testing aspects for the signal response of the claimed invention. Furthermore, See Applicant's comments/arguments received 29 August 2007.

**Therefore, claims 6-8 and 19-29 are allowed.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
